

TAIWAN-LEGIT

A Resolution to Support TAIWAN's legitimacy within the International Community

Whereas we as citizens of the United States of American recognize TAIWAN as a free independent nation, and fully support and endorse their recognition into the international community.

Whereas TAIWAN has peacefully evolved into a vibrant liberal democracy and stands as a leading example of freedom around the world.

Whereas TAIWAN is already operating as a sovereign nation with its own government, military, and constitution.

Whereas TAWIAN preserves basic principles for personal freedom, human rights, and holds transparent democratic elections.

Whereas Taiwan represents the very essence of why the United Nations and other global institutions of peace exist, and its reentrance into these organizations will help promote freedom to the world.

Whereas TAIWAN is under the constant threat of War, from the People's Republic of China, an Authoritarian communist regime.

Whereas the PRC actively participates in various forms of intimidation, disinformation, election interference, and military coercion against TAIWAN.

Whereas the Peoples Republic of China has never ruled Taiwan.

Whereas Taiwan's citizens overwhelmingly reject the Chinese communist system and fully embrace democratic principles.

Whereas Taiwan shares the same value system as the United States of America and is a key ally in competition against Authoritarian systems such as the People Republic of China.

Whereas the ambiguity of the United States official policy on Taiwan, which was drafted over 40 years ago, is severely outdated and is not consistent with the evolution of Taiwan's peaceful democracy.

Whereas we as citizens of the United States of America call on our legislators to update our official policy to formally recognize TAIWAN and support its reentrance into the international community.
